

The **GumDrop** pacifier fits your baby's needs ... without trimming!

- Lighter weight than other silicone pacifiers
- GumDrop stays in babies' mouths longer
- Same standard nipple shape babies love
- Curved to fit baby's face

What breast-feeding moms are saying about GumDrop

"My daughter got this pacifier ... in the NICU ... Not only did it help her figure out nursing right away but it is an amazing soothing thing for her. I love it!"

— Amy, Cedar Rapids, IA

Give your babies a taste of greater comfort and safety

- Single-body construction won't come apart
- Soft silicone covers entire surface, so pacifier rests comfortably against baby's face
- Meets Consumer Product Safety Commission standards for pacifiers
- Approved for hospital and home use
- The lowest profile pacifier – accommodates all CPAP, nasal cannulas and side-lying
- No need to cut-down or modify your pacifiers, cut-down pacifiers violate federal law*

Two sizes: **Preemie** (Lime); **Newborn** (Mango, Pink, Blue)

* Trimmed silicone pacifiers fail pull-through safety tests required by an agency of the US government (Consumer Product Safety Commission Part 1511).

GumDrop Pacifier—the perfect fit without trimming

When you cut down a pacifier, it no longer meets US government safety requirements. Babies can be put at risk with an unsafe pacifier and the possibility of loose bits of silicone. That's why we created GumDrop. GumDrop is a safe, soft topped pacifier that's designed to fit your baby's face comfortably – even with nasal tubes and cannulas. And it's perfect for side-lying. Babies love GumDrop's low profile, curved shape and familiar nipple shape.

GumDrop's soft, low-profile design means even CPAP babies can enjoy non-nutritive sucking.

Special, uni-body construction – won't fold or come apart

GumDrop's uni-body construction means that the pacifier can't be disassembled and won't come apart. Its unique design involves a plastic guard that is completely over-molded with medical grade silicone. So GumDrop's surfaces are as soft as the nipple itself. GumDrop's open back lets you easily position and reposition the pacifier in the baby's mouth.

Pacifiers may help reduce the risk of sudden infant death syndrome (SIDS)

American Academy of Pediatrics guidelines, published November 2005, recommend offering a pacifier at nap-time and bed-time throughout the first year of life¹. Introduce pacifier use in your hospital nursery with GumDrop.

“... I tried (another) pacifier at the hospital but it was too heavy ... GumDrops are so easy for her to keep in her mouth. Plus the nipple is shaped like a mother's nipple ... a big bonus since she's nursing.”

– Nichole's Mom, Whitefield, NH

Ordering information

Parents can purchase GumDrop pacifiers directly at many local retailers or order at 1.800.396.1550 or online at www.gumdroppacifier.com. Many hospital gift shops or pharmacies also sell GumDrop pacifiers. For a product trial or questions, please contact Natus customer service at 1-800-303-0306.
